/ ALL ABOUT ME

I'm an experienced software engineer specializing in JavaScript technologies like TypeScript, Next.js, and React. Adapted to dynamic environments by embracing change and fostering teamwork; leveraged three years of experience to tackle new challenges and enhance skills, resulting in a 25% improvement in project success rate

/ WORK EXPERIENCE

>> Master Freelance at Front End Dev

Social Media Project | 2023 to Present

[Link of website](#)

- Proficient in front-end development with extensive experience in Next.js, React-Query, Axios, Context API, Tailwind CSS, and TypeScript.
- Developed various pages such as chat, following/followers, and admin control panel.
- Implemented real-time chat functionality using Socket.IO.
- Deepened understanding of Next.js technology through project development.

Piocrowd Project | 2023 to 2024

[Link of website](#)

- Proficient in front-end development, leveraging React-Query, Axios, and Context API for efficient data management.
- Handled user interfaces and functionality using Next.js, Tailwind CSS, and TypeScript.
- Key contributions include implementing main unauthenticated pages, admin control panel, and two-way user panel.
- Leveraged Next.js extensively for front-end development and implemented i18n for bilingual support in the web application.

>> Front End Developer

Apanco Company | 2021 to 2023

- Made user-friendly interfaces with React, React Router DOM, and Tailwind CSS.
- Optimized performance and downtime, achieving a 16% reduction through cleanup processes.
- Oversaw wireframe designs based on client requests to ensure project alignment.
- Worked with Tailwind CSS for efficient styling and RTK for simplified state management in Redux setup.

>> Web Developer Intern

Sepehr Academy | 2020 to 2021

- Proficient in front-end development:
- Extensive experience with HTML, CSS, and JavaScript.
- Utilized Sass for efficient CSS styling and management.
- Developed user interfaces, including landing pages, authentication pages, and other interfaces, while ensuring modern design principles and best practices were applied.
- Designed mockups and wireframes for three new landing pages and explored new product concepts through prototyping and design exploration.
- Used Bootstrap framework for rapid development, responsive design, and ensuring cross-browser compatibility and consistency across devices.
